

## IR Learning Method

The remote has five IR learning keys can be programmed to learn some basic functions of TV remote. One Power button and four color IR learning buttons as showed the product Diagram. Take learning POWER ON of TV remote for an example

Note: The red TV button just a button that switch 2.4G and IR learning keys, asst enter and exit IR learning mode, can't be programmed to learn TV remote buttons.

### Step 1

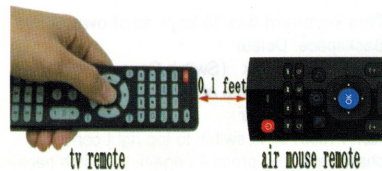

Make sure that your TV remote supports NEC protocol for learning, batteries installed correctly and led indicator flash red when press any buttons.

batteries slot

### Step 2

Set the air mouse and TV remote facing each other with top ends, keep the distance between them within 0.1 feet.

tv remote

air mouse remote

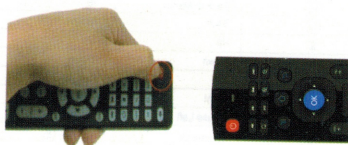

### Step 3

Press and hold the "TV" button on the air mouse remote for 4-5 seconds until LED light flash from fast to slowly, let go of TV button and wait for LED light to flash again, then the remote will enter IR learning mode.

### Step 4

Press the "Power" button on the TV remote to learn about 4-5 seconds until the LED light on the air mouse remote starts to flash. Then press the Power button or one of four color IR learning button that need to learn, the LED indicator of air mouse remote will flash slowly, indicating the success of IR learning.

### Step 5

Press the "TV" buttons on the air mouse remote to exit learning mode, then press the button that has been learned, you can use this remote to control your TV Power on.
